

## Aston Martin Showroom - Case Study

Aston Martin is a company that needs little introduction. With almost 100 years of unparalleled engineering excellence they have helped craft British engineering into a worldwide icon. The Newport Pagnell Aston Martin is a new 10-car showroom which will be the face of a full redevelopment at Tickford Street.

Allgood Trio worked closely with the contractors Talbot Construction as well as Casu Consulto Glass Systems in order to achieve the best possible solution. The specifications of the project required custom made bi-parting automatic sliding door operators so suit the huge glass doors.

The vehicular entrance also required a very unique approach, a one off "special" heavy duty single sliding automatic door operator to suit steel framed 3.5m x 3.5m glass door weighing in excess of 400kg.

The final result was a showroom of stunning aesthetic perfectly suited to house such stunning automotive masterpieces.
