

We manufacture and supply architectural  
ironmongery of the finest quality in design  
and craftsmanship with the confidence of  
a lifetime's performance.

“

*At the heart of Allgood is an ethos of quality: quality of products and quality of service - quality that adds value.*

## Why Allgood

For over 70 years, Allgood has been trusted to deliver the complete specification service. Our partners have the reassurance that we provide a single source guaranteeing a fully coordinated package of ironmongery and hardware.

We pioneered the world's first fully coordinated range of ironmongery in 1965 with the launch of our Modric range. Today, we continue to offer this consistent aesthetic, unrivalled durability, and ironmongery and hardware that is fully certified and compliant with all relevant regulations.

In these uncertain times, our longstanding policy of 'UK first' in our manufacturing and sourcing decisions means over 90% of our products are from UK-based suppliers. This includes our own manufacturing operation in Birmingham which produces 25% of what we sell. We champion British manufacturing, and this also mitigates the potential risks of international supply chains.

A single partner for complex times: your guarantee of quality.

## Our history

Allgood was formed in 1948 by Paul Shirville and Derrick Carter-Clout who grasped an opportunity to provide a complete architectural ironmongery service for the growing post-war construction sector.

The idea was simple; offer a quality of products through a quality of service.

Since inception, we have strived to lead the industry through design, innovation, and service. You can see the many milestones of our business on the timeline overleaf. Today, Allgood remains privately owned by the same two families and while we may have grown, we have never lost our founding principles.

**GUILD OF ARCHITECTURAL IRONMONGERS**  
Paul Shirville was instrumental in establishing the GAI

**MODRIC** 1965  
Launched the first fully coordinated range of architectural ironmongery and hardware.

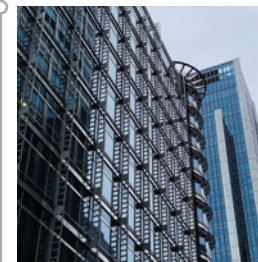

**MOVING ON**

## 1970s

## Our portfolio

Over 50 years ago we launched the first ever range of coordinated ironmongery called Modric. We have continued to innovate in design and lead the way in performance and now offer a collection of beautiful ironmongery ranges that are stunning and will last a lifetime.

### Holt

Inspired by nature.

From architect Alex Mowat, a range of door and bathroom products in European oak, made exclusively in our British factory. An elegant super circular design provides a welcoming, warm aesthetic: grade 316 stainless steel concealed fixing roses guarantee durability.

### Mode

A more dynamic design.

Mode is a collection of door furniture that offers the same Allgood quality of design and materials, with a more dynamic aesthetic. Made from grade 316 stainless steel and available in exclusive Spectra Tech decorative finishes.

### Sembla

One range, many choices.

Designed by ASK with a versatile assembly of central node, grip, and tip, offering a fully configurable ironmongery solution. Made from grade 316 solid stainless steel in our British factory, with a range of highly durable applied and Ultrafabric finishes.

### Continental

Classic style, contemporary performance.

An all-new collection of solid cast brass ironmongery evoking a bygone era, Continental comprises seven timeless designs of coordinated levers and pull handles. Made in Britain exclusively for Allgood, the range is available in seven opulent finishes including living bronze and brass. With a 25-year warranty and made using the latest techniques and finest materials, Continental offers classic style and enduring performance.

### Contego

A first defence in infection control.

Based on our iconic Modric range using a unique copper alloy, a range of ironmongery with the antimicrobial properties of copper and the appearance of stainless steel that kills 99.9% of pathogens within minutes. Made exclusively in our British factory.

### Modric

The original icon since 1965.

Inspired by the collaboration between Alan Tye and Knud Holscher on the 1965 Saint Catherine's College Oxford design, and made exclusively in our British factory. The world's first coordinated range of ironmongery. Crafted from grade 316 solid stainless steel and designed to last a lifetime, comfortably exceeding BSEN and ANSI standards with a 25-year warranty.

## Our philosophy

Our vision is to become the most trusted architectural ironmongery partner.

We believe our clients and collaborators should be able to measure this by our expertise, our service, and the quality with which we operate.

From this vision, we have a mission to provide the highest quality architectural ironmongery through exemplary service.

## Our values

- To be experts in our products and the sectors in which we operate
- An unwavering commitment to quality in design and craftsmanship
- To deliver a consistent quality of service
- To add value however and wherever possible
- To be excellent at communications
- To take personal responsibility and always be accountable
- To understand the challenges our customers face
- To encourage and support all our people to make a difference

## Our manufacturing capabilities

We are the only UK architectural ironmonger with a dedicated UK manufacturing operation. Based at our Brearley Street site in Birmingham we routinely produce over 100,000 pieces of ironmongery a year. From the complete Modric range, to our patented Quadaxial™ rose, to bespoke commissions, we manufacture in high volumes and in specialist batches, with an unparalleled attention to detail.

## Services

### Advice and scheduling

Allgood has always been a specification-led business. We understand the modern challenges facing design and specification and will work in partnership to support design-led ambition in a value-led world. From support on product selection and scheduling, to advice and guidance on regulatory compliance as well as addressing value engineering concerns - we will be with you at every step.

Our fully GAI qualified specification consultants will find the individual solution for each project to match design, performance, and value demands. We have the biggest estimating team in the industry, regularly producing over a hundred schedules a week. From specialist projects in the UK, to multi-million-pound investments in the Middle East, every project is important to us.

### Allgood International

Since 1975 we have worked across the world on many landmark international buildings. From installing ironmongery on the first world trade centre in Dubai in the 1970s, to our bespoke work on the opulent Four Seasons hotel in Kuwait, we bring our expertise and decades of experience to our international partners, offering local support in 25 countries.

Allgood has a team of highly experienced specification consultants and estimators who have worked on many major international projects. From ensuring schedules comply with ANSI, BSEN and other local codes, delivering sample boards anywhere in the world, to providing local onsite support across four continents, our team offers a comprehensive specification, scheduling, and project management solution.

Bespoke pull handles at the Four Seasons Hotel Kuwait

### Bespoke

Bespoke projects require a rare combination of experience and expertise. We have spent decades designing and delivering individual pieces or full ranges of bespoke ironmongery for projects across the world. Our knowledge of material, processes and finishes combined with design acumen, means we guarantee a quality of service to meet the most discerning client.

Our own designers work with dedicated quality and purchasing teams to develop beautiful concepts that are also practical. Thought-provoking design combined with expertise in material choices and craftsmanship create bespoke pieces that are strikingly individual, and concepts that meet all compliance considerations with pragmatism in every single detail. As the only UK architectural ironmonger with a dedicated British manufacturing plant, we can deliver scale without compromise.

### Allgood Secure

For over 30 years, Allgood Secure has offered the complete integrated security solution to architects, designers, and M&E contractors. As part of Allgood, we appreciate the importance of a design-led solution and our choices of access control, automatic doors, and security products will complement the project aesthetic: offering form and function.

We also have a comprehensive range of contactless access control products that can be easily fitted to upgrade existing doors and access points to remove potential infection hotspots.

Using our in-depth knowledge and experience we can advise on fire and security projects at the design stage, through specification and right up to tender phase. We can simply supply the products or coordinate the full project management and installation service, as well as providing customised maintenance and service packages.
